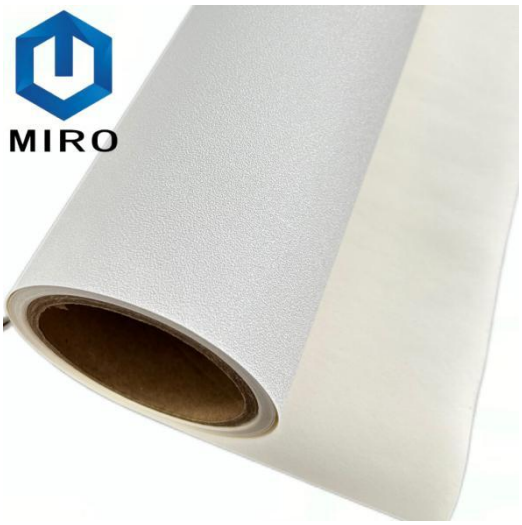
MIRO®M-VW Series

PVC Wallpaper



Description

The MIRO® M-VW280, M-VW250E material is a kind of textured high-quality vinyl wallpaper, which is made of pvc foam coating backed with paper or non woven paper. It features excellent water-proof performance and printing effect. Deep textures such as coarse sand textures, fine sand textures, canvas textures make this material popular among clients. It is compatible with Eco-Solvent, Latex, and UV inks. With outstanding vivid color performance, it is widely used in the interior decoration industry.
